Placement rates are based on total number of responses by major as of December 1, 2011.

This report counts the number of majors, not students. Students could graduate with two majors in which case they would be listed under each major.

Percentages do not add up to 100% because students may be counted in more than one category.

Three students indicating further study were continuing in bachelor degree programs in their field at the Mount.

One student indicating further study was continuing at The Cincinnati College of Mortuary Science.
